Product Description

Coin-Operated Fishing Game Machine Multiple People With System

Product Parameter

Model	JTS-1648
Interior tank size:	4000*1500*1000 mm;
Capacity:	6000 liters;
Material:	Stainless steel 304 + 201 Shell;
Ultrasonic frequency:	28khz
Transducers;	With 648 pieces transducers;
Ultrasonic power	34.2 KW;
Generator power	220V, 50/60HZ
Working voltage:	380V 50HZ;

Product Description

A fish game table, also known as a fish arcade game or fishing game table, is a type of electronic gaming machine typically found in arcades, game rooms, or entertainment venues. These tables are designed to simulate the experience of fishing and feature a variety of colorful underwater-themed graphics and gameplay. Here's a general overview of how a fish game table works:

- 1. Gameplay Setup:** Players sit around a large table that typically has a screen embedded in its surface. Each player has a dedicated control panel with buttons, a joystick, or a trackball for interacting with the game.
- 2. Game Selection:** Players can choose from various fishing game titles or themes available on the machine. Each game may have its own unique visuals, fish species, power-ups, and special features.
- 3. Gameplay Mechanics:** Once the game starts, players control an on-screen fishing character (typically represented as a hook, net, or another tool) and aim to catch fish swimming across the screen. The controls allow players to move their character horizontally or vertically and to shoot or capture fish
